Hiring Manager Pearson Sri Lanka

Application for Associate Cloud Engineer (Intern) Position

Dear Hiring Manager,

I am writing to express my strong interest in the Associate Cloud Engineer (Intern) position at Pearson. As a BEng (Hons) Software Engineering undergraduate at the Informatics Institute of Technology, I have developed a solid foundation in modern cloud-native technologies, backend development, and automation, making me a strong fit for your team.

My academic and practical background aligns closely with the technical requirements of this role. In my recent full-stack project, "QuickRead" (a smart prescription scanning and pharmacy delivery system), I successfully utilized Docker for containerization and deployed a MySQL database on AWS RDS. This hands-on experience with AWS infrastructure and container technologies provided me with practical insights into cloud deployments and database management.

Furthermore, I have developed strong programming skills in Python through building a standalone command-line application for analyzing European air traffic datasets. I also possess practical experience with Generative AI and Large Language Models; as an active user of the Google AI Pro student plan, I regularly utilize platforms like Google AI Studio to streamline development workflows. Additionally, I have built REST APIs using Node.js, Express, and PostgreSQL, which has strengthened my understanding of backend development and data pipelines.

I am deeply motivated by Pearson's purpose to help people realize the life they imagine through learning. I am eager to bring my problem-solving skills and enthusiasm for cloud computing to your collaborative engineering environment. I look forward to the opportunity to assist in designing and maintaining AWS cloud infrastructure, supporting CI/CD pipelines, and expanding my knowledge of Infrastructure as Code under the mentorship of your experienced engineers.

Thank you for considering my application. I have attached my resume for your review and look forward to the possibility of discussing how I can contribute to Pearson's impactful cloud engineering projects.

Sincerely,

Sunera Dilnath Rathnayaka
