# DILNATH RATHNAYAKA

Software Engineering Undergraduate

Address: Matara, Sri Lanka • Mobile: +94 70 557 3095
Email: sunerarathnayaka@gmail.com LinkedIn: www.linkedin.com/in/dilnath-rathnayaka-3282a127b |
GitHub: github.com/Dilnath225

## PROFESSIONAL SUMMARY

Motivated 3rd-year BEng (Hons) Software Engineering undergraduate at the Informatics Institute of Technology, affiliated with the University of Westminster, with hands-on experience in backend systems and modern web development using Go (Gin), Python, and Next.js. Skilled in MySQL, AWS RDS, and Docker, with a proven track record of engineering scalable platforms such as 'QuickRead' and delivering production web solutions for corporate clients. Seeking a software engineering internship to apply technical and problem-solving abilities.

## SKILLS & FAMILIAR TECHNOLOGIES & TOOLS

- Go (Golang)
- JavaScript
- React Native
- MySQL / MariaDB
- REST APIs / JWT
- Git
- Python
- HTML5 / CSS3
- Angular.js
- AWS RDS
- OCR / NLP
- Data Analysis
- Java
- React.js / Next.js
- Flask
- Docker
- Azure AI Studio
- UI/UX

## EDUCATION

- **Informatics Institute of Technology** (affiliated with the University of Westminster)

*BEng (Hons) Software Engineering*

- **St. Thomas' College, Matara**

*Secondary Education*

## COURSES, CERTIFICATIONS & ACHIEVEMENTS

- Azure AI Essentials - Microsoft (2025)
- CSS Skill Certification - HackerRank (2025)
- 2nd Place, All Island Music Competition - Dhrupad Vocal & Dhrupad Instrumental (2018, 2019)
- College Prefect, St. Thomas' College Matara (2018-2019) - assisted in maintaining school discipline and supporting events

## PROJECTS

**Quick Read - Smart Prescription Scanning and Pharmacy Delivery System**

- Engineered a RESTful backend API using Go (Gin) with secure authentication, role-based access control, and order processing.
- Designed a MySQL (AWS RDS) relational database schema to manage patient data, inventory, and dynamic order statuses.
- Implemented image-upload endpoints integrated with OCR/NLP to extract text from prescription images; built a real-time GPS tracking module for delivery drivers.
- Containerized the application and database environments with Docker for consistent development.

***Technologies:*** *Go, Gin, Python (Flask), React Native, MySQL, AWS RDS, Docker, REST APIs, OCR/NLP, JWT, HTML/CSS, Git*

**Ultra Engineering - Corporate Web Platform & Industrial Portfolio (Lead Full-Stack Developer)**

- Engineered and deployed a corporate web platform for a leading high-voltage diagnostics and cable-fault-scanning engineering firm, using React.js, Tailwind CSS, and Vite for a fast, responsive UI.
- Digitized extensive offline project records - including the Kelanitissa Power Plant and Southern Expressway - into a dynamic online portfolio.
- Implemented an SEO strategy (meta tags, XML sitemaps, Search Console) and an automated lead-generation system via Web3Forms; configured custom DNS/SSL on Netlify.

***Technologies:*** *React.js, Tailwind CSS, Vite, Netlify, Web3Forms*

**CEM Engineering - Corporate Web Platform & Interactive Portfolio**

- **Project Overview:** Engineered and deployed a modern corporate web platform and digital portfolio showcase for CEM Engineering to elevate their brand presence and client acquisition.
- **Interactive 3D Visuals:** Integrated Three.js to render custom, interactive 3D graphical elements, delivering an engaging and visually dynamic user experience.
- **High-Performance Architecture:** Leveraged Next.js for efficient server-side rendering, routing, and optimized build performance to ensure ultra-fast load times.
- **Responsive UI Styling:** Designed and implemented a sleek, modern, mobile-first user interface using Tailwind CSS for streamlined styling and cross-device consistency.

***Technologies:*** *Next.js, Three.js, Tailwind CSS, JavaScript, Git*

**Zero Hunger Initiative Website**

- **Front-End Development:** Architected and developed the 'User Profile' and 'Sitemap' pages from scratch using modern web standards.
- **Responsive Design:** Implemented mobile-first design principles to ensure seamless functionality and visual consistency across desktops, tablets, and smartphones.**User Experience (UX):** Designed an intuitive Sitemap to enhance website navigation and a dynamic User Profile interface to drive user engagement.
- **Problem Solving:** Debugged front-end logic and refined CSS styling to ensure cross-browser compatibility.

***Technologies:*** *HTML5, CSS3, JavaScript, GitHub*

**European Airports Data Analysis System**

- **Data Processing:** Engineered an algorithm to parse CSV datasets into nested Python lists, extracting complex metrics such as delayed flight percentages and average hourly departures.
- **Input Validation:** Built a robust, interactive command-line interface with strict data validation to ensure user inputs met exact formatting and range requirements.
- **Data Visualization:** Designed and implemented an auto-scaling histogram using a custom graphics module to visually represent hourly flight departures for specific airlines.
- **File Handling & Architecture:** Created a continuous-loop program allowing users to process multiple datasets in one session, automatically appending results to a persistent text file.

***Technologies:*** *Python, Tkinter*

## LANGUAGES

Sinhala • English
